ABSTRACT

Fall 1987 "end-of-registration" enrollment data were gathered for the 50 public community colleges in Illinois and compared with data from previous years. Highlights of the analysis indicate that: (1) the colleges enrolled 324,163 students in instructional credit courses, representing a decrease of 3.2% from the fall 1986 term; (2) full-time equivalent enrollment decreased 3.0% between fall 1986 and fall 1987; (3) the proportion of full-time students enrolled in community colleges increased from 28.7% in fall 1986 to 29.5% in fall 1987; (4) almost half of the full-time students were enrolled in pre-baccalaureate transfer curricula; (5) the number of male students decreased at a higher rate than the number of female students; (6) minority student headcount enrollment decreased in both numbers and the proportion of total student enrollment in comparison to the fall 1986 term; (7) the median age of community college students was 27.4 in fall 1987 and 28.0 in fall 1986; (8) over 45% of the students enrolled in fall 1987 had been enrolled at the same college the previous term; (9) the proportion of first-time students decreased from 34.6% in fall 1986 to 34.0% in fall 1987; and (10) enrollments decreased in all program areas except pre-baccalaureate transfer and vocational skilis. Data is displayed in 14 tables. An appendix provides a breakdown of enrollment by classification of instructional programs codes. (UCM)

HIGHLIGHTS OF FALL 1987 OPENING ENROLLMENT REPORT

- . 1. At the "end-of-registration" in the Fall 1987 term, the 50 public community colleges in Illinois enrolled 324,163 students in instructional credit courses, a decrease of 10,721 students (3.2 percent) from the Fall 1986 term (see page 2).
 - 2. The full-time equivalent (FTE) enrollment in the Fall 1987 term was 161,138, a decrease of 5,066 (3.0 percent) from the Fall 1986 term (see page 2).
 - 3. The proportion of full-time students enrolled in community colleges increased from 28.7 percent in the Fall 1986 term to 29.5 percent in the Fall of 1987 (see page 4). Almost half (46.3 percent) of these full-time students were enrolled in pre-baccalaureate transfer curricula (see page 9).
 - 4. The number of female students decreased from 192,782 in the Fall of 1986 to 190,042 in the Fall of 1987 (a decrease of 2,740 or 1.4 percent). The number of male students also decreased but at a higher rate (142,102 to 134,121 or 5.6 percent) (see page 4).
 - 5. The analysis of Fall 1987 enrollment by ethnic origin showed minority student enrollment headcount decreasing in both numbers and the proportion of total student enrollment in comparison to the Fall 1986 term. The distribution for Fall 1987 was as follows: Asian or Pacific Islander, 3.6 percent; American Indian or Alaskan, 0.4 percent; Black, 14.9 percent; Hispanic, 7.0 percent; White, 73.9 percent; Non-resident Alien, 0.2 percent (see page 5).
 - 6. The analysis of student enrollment by age reveals that the median age of community college students enrolled in the Fall term of 1987 was 27.4. This was 2 decrease from a median age of 28.0 in Fall 1986 (see page 5). The mean age was 31.3 in Fall 1987 compared to 31.9 in Fall 1986.
 - 7. The number of freshmen enrolled in community colleges decreased from 176,914 in the Fall of 1986 to 174,819 (a decrease of 1.2 percent) in the Fall of 1987. The number of sophomore students also decreased very slightly from 53,930 in Fall 1986 to 53,717 in Fall 1987 (see page 6).
- 8. Over 45 percent of the students enrolled in the Fall of 1987 had been enrolled at the same college the previous term. The proportion of students enrolled for the first time decreased from 34.6 percent in the Fall of 1986 to 34.0 percent in the Fall of 1987 (see page 7).
- 9. An analysis of enrollment by instructional program area showed that enrollments decreased in all program areas except pre-baccalaureate transfer where they held steady and vocational skills which experienced nearly a 25 percent increase in enrollment (see page 8).

i

Introduction

Accurate and comprehensive information on community college enrollment is important at the local, state, and national levels. This information is used not only to analyze historical enrollment trends but also for planning future programs, curricula, financing, and facility needs. Each college provides the Illinois Community College Board with data on each student enrolled in credit generating courses. These computerized data are used to produce various reports on student characteristics and curricula enrollments in Illinois community colleges. From this centralized statewide student data base, the data needs of both state and national agencies and legislative bodies can be met.

This report focuses on a summary of statewide student enrollment trends and student characteristics in Illinois public community colleges. The analyses are based on Fall 1987 opening enrollments as reported by the colleges at the end of the regular fall registration period (usually the 10th day of the term). These data do not reflect enrollment in courses that begin after the end of the regular registration period. For colleges having two or more modules during a semester, only those students enrolled in the first module are included. Therefore, these enrollments do not include all students who enroll during the fall term. They are, however, comparable counts from year to year and from institution to institution. They are also comparable to fall enrollment data in institutions of higher education throughout the nation.

For comparison with past fall enrollments, summary data for the last five years are presented. In addition to the summary data, a detailed table comparing Fall 1986 and Fall 1987 headcount and FTE enrollments by college is included. Additional enrollment data for each community college will be included in the Fiscal Year 1988 edition of the <u>Data and Characteristics of the Illinois Public Community College System</u>.

Student Enrollment by Community College

Fall opening headcount enrollment for 1987 (Fiscal Year 1988) was 324,163, and full-time equivalent (FTE) students totaled 161,138. Table 1 compares these enrollment data with similar data for the previous four years. A comparison of student headcount enrollment for 1987 with data from a year ago shows a decrease of 3.2 percent or 10,721 students. FTE enrollment decreased 3.0 percent from 166,204 to 161,138. Compared to enrollments in Fall 1983, headcount has decreased by 9.1 percent and FTE enrollment by 10.1 percent.

Table 1

SUMMARY OF OPENING FALL ENROLLMENTS IN
PUBLIC COMMUNITY COLLEGES IN ILLINOIS FROM 1983 TO 1987

	1983	1984	1985	1986	1987
Headcount	356,643	361,186	339,782	334,884	324,163
Percent Change	-8.0%	1.3%	-5.9%	-1.4%	-3.2%
FTE	179,165	176,466	166,674	166,204	161,138
Percent Change	-5.3%	-1.5%	-5.5%	-0.3%	-3.0%

Table 2 on the next page provides a comparison of 1987 fall opening enrollments with 1986 fall opening enrollments for each community college. Of the 50 colleges, 21 showed increases, 26 showed decreases, and three showed little or no change (< 1.0 percent) in headcount. FTE increases were reported by 19 colleges, decreases by 24 colleges, and little or no change by seven colleges. The Fall 1987 statewide decline in headcount and FTE can be accounted for by enrollment declines at City Colleges of Chicago. Part of City Colleges decline was due to part of their regular registration sites at Chicago public high schools not being available until after the fall census date. Therefore, students who enrolled after the census date were not included in the counts that appear in this report. Statewide headcount excluding City Colleges increased 1.0 percent and statewide FTE excluding Chicago remained stable with a 0.4 percent change.

Summary of Full-Time/Part-Time Enrollments

A comparison of Fall 1987 full-time/part-time enrollments with those for the past four years showed that the proportion of full-time students declined to the lowest point in 1985 but increased in 1986 and 1987 (see Table 3). After experiencing a steady decrease from 30.3 percent in 1983 to 28.2 percent in 1985, the proportion of full-time students increased slightly to 28.7 percent in 1986 and 29.5 percent in 1987. The actual number of full-time enrollees decreased by 0.5 percent from the same time a year ago while part-time enrollments experienced a decline of 4.3 percent.

Table 3

COMPARISON OF FULL-TIME AND PART-TIME OPENING FALL HEADCOUNT ENROLLMENTS
IN PUBLIC COMMUNITY COLLEGES IN ILLINOIS FROM 1983 TO 1987

^{*}Enrollment decreases due in part to unavailable registration sites at the time of 10th day census count.
**Enrollment decrease due in part to inflated fall 1986 census count.

Summary of Male/Female Enrollments

Table 4 presents a summary of male and female headcount from Fall 1983 through Fall 1987. During this period the male/female student distribution has remained relatively constant with females comprising over 57 percent of the total enrollment. Following a slight increase in the proportion of male students last fall, the Fall 1987 data revert back to the trend that has been seen over the last several years — that of a very gradual increase in the proportion of students who are females.

Table 4

COMPARISON OF MALE AND PENALE OPENING FALL HEADCOUNT EMROLLMENTS
IN PUBLIC COMMUNITY COLLEGES IN ILLIMOIS FROM 1983 TO 1987

	1983	1984	1985	1986	1987
Hale	152,001 (42.6%)	152,420 (42.2%)	142,970 (42.1%)	142,102 (42.4%)	134,121 (41.4%)
Percent Change	-8.2%	0.3%	-6.2%	-0.6%	-5.6%
Female	204,642 (57.4%)	208,766 (57.8%)	196,812 (57.9%)	192,782 (57.6%)	190,042 (58.6%)
Percent Change	-7.9%	2.0%	-5.7%	-2.0%	-1.4%

Summary of Ethnic Origin Enrollments

A comparison of Fall 1987 with Fall 1986 shows a decline in headcount in all racial/ethnic categories except Asian/Pacific Islander and non-resident alien (see Table 5), which increased by 10.2 percent and 0.9 percent, respectively. Black enrollments continued to decline both in headcount and in their share of the total enrollment. The most noteworthy trend in racial/ethnic enrollments over the last few years has been the declining share of black enrollment compared to the increasing share of Hispanic enrollment. In Fall 1984, blacks represented 18.3 percent of the student population. By Fall 1987, that proportion had fallen to 14.9 percent. Hispanic students comprised 4.8 percent of the total community college enrollments in 1983. This percentage has risen each year although it appears to have leveled off in 1987 with a slight decline to 7 percent. While headcount decreases occurred among American Indian students, their proportional representation remained the same.

Summary of Enrollments by Age Category

After experiencing a decrease between 1985 and 1986 to 19.8 percent, the proportion and number of students under the age of 21 increased in Fall 1987 to 25.9 percent of the population (see Table 6). The proportion of students between the ages of 21 and 30 and those between the ages of 40 and 55 declined. Although the number and proportion of students ages 31 to 40 and those over 55 experienced increases, the increases in the number of younger students under 21 resulted in a slight decrease in both median and mean of the Fall 1987 community college population. The median age went from 28 to 27.4 years and the mean age from 31.9 to 31.3.

Summary of Enrollments by Student Level

Table 7 summarizes enrollments by student level or classification for the past five years. Freshmen comprised 53.9 percent of all community college enrollments in Fall 1987. This percentage is higher than last year, breaking the trend of the last four years. The number of sophomores, which had increased in 1983 and held steady in 1984, decreased by 11.0 percent in 1985 but remained relatively stable in 1986 and 1987. The number of high school students enrolled in community colleges declined again in 1987, down 521 students from the 1986 level. The number of unclassified students decreased in Fall 1987. Their proportion also decreased, from comprising 30.4 percent of the community college enrollment in Fall 1986 to 29.0 percent of the enrollment in Fall 1987. (Unclassified students are defined as students who do not meet minimum requirements for entrance as regular college-level students, including students who are enrolled in adult basic or adult secondary education. Students who already have a Bachelor's Degree or Associate Degree but who are taking courses at the same or lower level also are considered as unclassified.) While there have been some increases in adult and remedial education, examination of the data suggests that some colleges may be coding their incoming freshmen as "unclassified" during the students' first term. If this is occurring, interpretation of student level data is difficult.

Summary of Enrollments by Enrollment Status

Community college students are assigned to one of four enrollment status categories. First-time students are entering students who have not previously attended any college. In addition to first-time fall students, students who are enrolled in the fall term attending college for the first time during the previous summer are included in this classification. Transfer students are those persons entering the college for the first time with academic credit earned at another college or university. Continuing students were enrolled at the college the previous term, and re-admitted students are those who were

enrolled at the college previously but not enrolled the previous term (excluding summer). Table 8 presents a summary of the fall student enrollment status from 1983 to 1987. The proportion of students in each of these categories has fluctuated over the five-year period although it remained stable in 1987 when compared with last year's proportions. The largest proportion of enrollment is comprised of continuing students. Until 1986, more than half of the students enrolled in community colleges had been enrolled the previous year. The last two years have seen a decline below the 50 percent mark. The proportion of first-time students which had been steadily increasing since 1983 declined somewhat in 1987. All four categories experienced headcount decreases in 1987.

Table 8

Summary of Enrollments in Instructional Programs

A summary of total student headcount enrollments by instructional program areas from Fall 1983 through Fall 1987 is provided in Table 9. Pre-baccalaureate/transfer and occupational students taking courses but not pursuing a degree are shown as course enrollees and are included in the total program instructional areas except pre-baccalaureate/transfer and counts. All vocational skills experienced enrollment declines. The number of prebaccalaureate/transfer declined slightly but due to larger declines in other program areas, the proportion of these students actually increased from 34.6 percent in Fall 1986 to 35.7 percent in Fall 1987. While occupational enrollments decreased, vocational skills enrollments increased. Part of the vocational skills increase is due to a change in coding at one of the colleges. This change resulted in a decrease in general studies certificate enrollments and an increase in vocational skills enrollments. despite some changes in various program area enrollments, the general pattern of approximately one-chird occupational/vocational skills, one-third prebaccalaureate/transfer, and one-third other programs continues.

Table 9

COMPARISON OF OPENING FALL PRADCOUNT ENROLLMENTS IN INSTRUCTIONAL PROGRAM AREAS IN PUBLIC COMMUNITY COLLEGES IN ILLINOIS FROM FALL 1983 TO 1987

	1983	1984	1985	1986	1987

Enrollments in Instructional Programs by Full-time/Part-time Status. Table 10 illustrates the distribution of full-time/part-time attendance of students in different instructional programs in Fall 1987. Overall, 29.5 percent of community college students attend on a full-time basis (12 or more credit hours). A comparison of enrollment status among the instructional program areas reveals that the highest percentage (46.3 percent) of full-time students occurs in the pre-baccalaureate/transfer area. Of the pre-baccalaureate students, over 38 percent attend on a full-time basis. Slightly less than 30 percent of the occupational students are full-time enrollees. Vocational skills and general studies certificate students are enrolled primarily on a part-time basis—90.8 and 97.8 percent, respectively.

Table 10

Enrollments in Instructional Programs by Male/Female. Examination of male/female distribution in the instructional program areas shows the distribution within the pre-baccalaureate/transfer area (42.3 percent male, 57.7 percent female) to be similar to the overall student population distribution (see Table 11). In each of the instructional areas, females outnumber males. The highest proportion of males (46.9 percent) occurs in the adult basic education area. The highest proportion of females (68.2 percent) occurs in the general studies certificate area.

Enrollments in Instructional Programs by Racial/Ethnic Origin. Examination of each racial/ethnic category's representation across program areas shows that the largest percentages of white and non-resident aliens are enrolled in pre-baccalaureate/transfer programs — 40.1 and 43.6 percent, respectively. The highest percentage of American Indian and black students are enrolled in occupational programs — 34.5 and 26.8 percent, respectively. Adult basic education enrollments account for the largest percentages of Asian and Hispanic students — 30.7 and 55.2 percent, respectively. Since English as a Second Language courses are in the ABE program area, the high percentages of Asian and Hispanic enrollments in this area are reasonable.

In the overall student population the racial/ethnic distribution is as follows: Asian - 3.6 percent, American Indian - 0.4 percent, black - 14.7 percent, Hispanic - 6.9 percent, white - 72.8 percent, and non-resident alien -0.2 percent. A comparison of the racial/ethnic distribution of the overall student population with that of each of the eight program areas (e.g., pre-baccalaureate/transfer, occupational, etc.) shows that within the General Associate Degree area Asians, blacks, and Hispanics had higher representation than they did in the overall student population (6.1 vs. 3.6 percent, 28.8 vs. percent, and 7.3 vs. 6.9 percent, respectively). In the prebaccalaureate/transfer area only one group -- white -- had a higher proportion of the enrollment than was found in the general population. This was also the case in the occupational area. In vocational skills courses, a higher proportion of Asians and blacks occurred than was found in the general student population. In the remedial area, Hispanic was the only group that had a higher proportion. Adult basic and adult secondary education had relatively high proportions of minority students in comparison to the general population. In adult basic, Asian, black, and Hispanic comprised 10.7 percent, 28.9 percent, and 37.2 percent of the students compared with overall percentages of 3.6 percent, 14.7 percent, and 6.9 percent, respectively. Blacks comprised 36.1 percent and Hispanics 10.9 percent of the students in adult secondary education. White students comprised over 78 percent of the students taking general studies courses.

Enrollment in Instructional Programs by Age. Within the total community college population, 41.6 percent of the students are less than 25 years of age. Table 13 shows that within the various program areas the percentage of students under the age of 25 is as follows: general associate — 47.1 percent, pre-baccalaureate/transfer — 55.5 percent, occupational — 40.7 percent, vocational skills — 26.1 percent, remedial — 26.7 percent, ABE — 30.4 percent, ASE — 43.8 percent, and general studies certificate — 12.9 percent.

Examination of each age group's representation across program areas shows that 52.9 percent of all students age 17 through 20 and 39.7 percent of all 21 through 24 year old students are enrolled in pre-baccalaureate/transfer programs. The highest percentages of students in the age groups 25-30, 31-39, and 40-55 (37.9 percent, 38.2 percent, and 33.7 percent, respectively) occur in the occupational program area. Over 42 percent of all students over the age of 55 are enrolled in general studies courses. While the largest proportion of students less than 17 years old are enrolled in the pre-baccalaureate/transfer program area (25.9 percent), another 23.7 percent are in ASE courses.

Enrollments in Instructional Programs by CIP. The Fall Curriculum Enrollment Report presented in the appendix provides a listing of enrollments by Classification of Instructional Programs (CIP) codes for Fall 1987. Of the 115,681 pre-baccalaureate/transfer (1.1) students, 26,156 are students taking transfer courses but not pursuing a degree (course enrollees). Of the students pursuing transfer degrees, 58,578 are in Associate in Arts, 28,189 in Associate in Science, and 2,758 in Associate in Arts and Science degree curricula.

Of the 107,263 occupational (1.2) students, 14,881 were taking occupational courses but were not pursuing a degree or certificate. Business data programming (CIP 07.0305) continued to have the largest number of program enrollees with 8,924. However, this was a decrease of 2,457 (21.6 percent) from a year ago. The second largest curriculum was business administration and management (CIP 06.0401) with 6,556 students — an increase of 350 (5.6 percent) from a year ago. Other curricula with enrollments over 3,000 were accounting and bookkeeping (CIP 07.0101) with 6,157, associate degree nursing (CIP 18.1101) with 5,965, criminal justice administration (CIP 43.0105) with 4,173, child care aide (CIP 20.0202) with 3,870, secretarial (CIP 07.0606) with 3,864, and electronic technology (CIP 15.0303) with 3,131. In each of these curricula, except business administration and management and criminal justice, enrollments were lower than they had been in the Fall of 1986. Table 14 shows enrollments in occupational curricula with at least 3,000 students enrolled.
